

How to import the project?

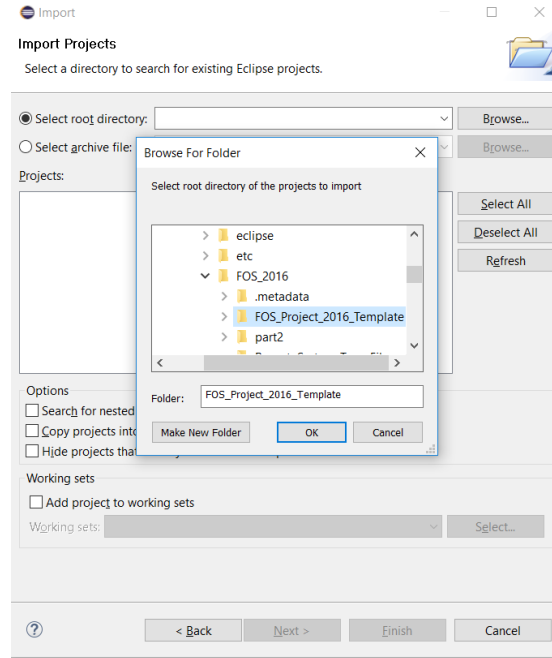

- 1- Unzip the FOS_Project_2019_Template in the FOS_CODES folder
- 2- In eclipse:
 - Right click in the project explorer
 - Choose 'Import Project'

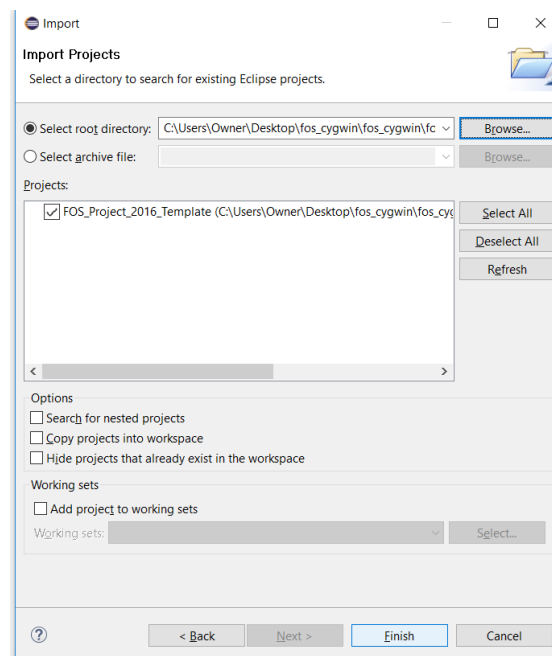

- Choose 'Existing Projects into Workspace'

- Browse for the path of the extracted folder

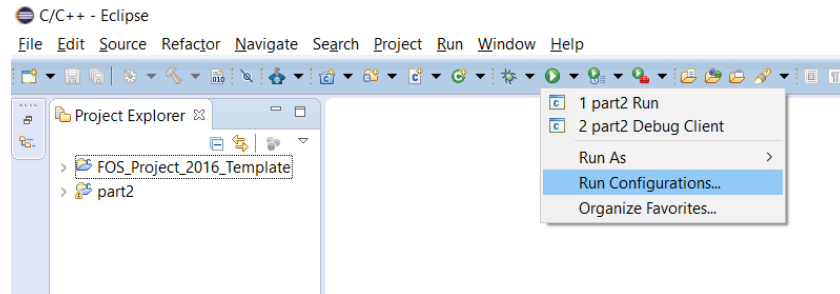

- Click 'Finish'

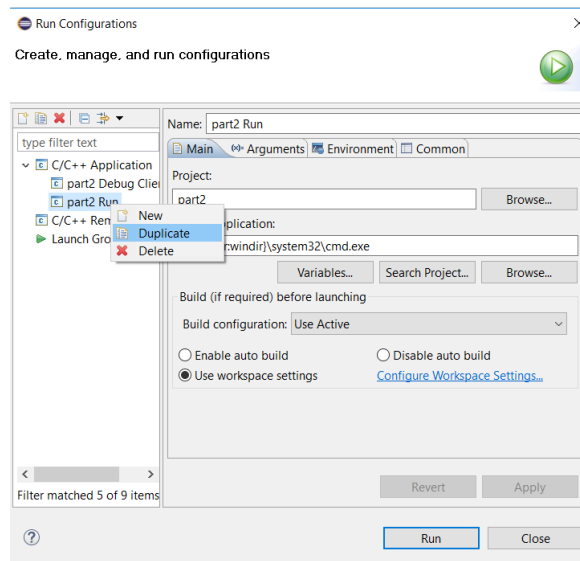

Now the project is added, we need to adjust the running configurations

- From the run, choose 'Run Configurations'

- Right click on 'FOS_Labs_Template Run' → Duplicate

- Rename it to be 'project Run' and choose the project path
- Click 'Apply' → 'Run'
